

Society of
Flight Test Engineers

Reference Handbook

Third Edition 2012

Society of Flight Test Engineers
Reference Handbook

2012 Edition

Corporate support supplied by

Cessna Aircraft for printing the 2007 Edition

And

The National Test Pilot School

Contributing Authors

Al Lawless (sections 1-8, 10-12, 15, 18)

Greg Lewis (section 2.6)

Bill Norton (sections 9, 13)

Dan Hrehov (section 14)

Steven Arney (section 16)

David Kidman, Christopher Moulder, Craig Stevens (section 17)

Edited by

Lee Gardner & Darcy Painter 1998-2006

Harold Weaver 2006-2012

The SFTE handbook committee continually seeks
corporate sponsors for this book and authors for new sections
(including but not limited to INS, GPS, EMI/EMF, radar, avionics, R&M, E-O, human factors, orbital mechanics, armament)

SFTE Reference Handbook

Quick Index

Tab	Section
1	General Information
2	Mathematics
3	Earth and Atmosphere
4	Pitot Statics
5	Aerodynamics
6	Axis Systems and Transformations
7	Mass Properties
8	Motion/Vibration Analysis
9	Material Strength (Loads)
10	Reciprocating Engines
11	Propellers
12	Fixed-Wing Performance Standardization
13	Acoustics
14	Electromagnetic Compatibility
15	Handling Qualities
16	Rotary Wing
17	Gas Turbine Propulsion
18	Radio Communications

SFTE

Reference Handbook

Complete Table of Contents

Tab	Section
1	General Information
1.1	Unit Conversions
1.2	Greek Alphabet
1.3	Greek Symbols Used for Aircraft
1.4	Common Subscripts
1.5	Common Abbreviations
1.6	Sign Conventions
1.7	Thermodynamic Relations
1.8	Mechanics Relations
1.9	International Phonetic Alphabet and Morse Code
2	Mathematics
2.1	Algebra
2.2	Geometry
2.3	Trigonometry
2.4	Matrix Algebra
2.5	Vector Algebra
2.6	Statistics
2.7	Standard Series
2.8	Derivative Table
2.9	Integral Table
2.10	Laplace Transform Table
3	Earth and Atmosphere
3.1	Universal Constants
3.2	Earth Properties
3.3	General Properties of Air
3.4	Standard Atmosphere
3.5	Sea States
3.6	Sunrise and Sunset Times
3.7	Crosswind Components
4	Pitot Statics
4.1	Subsonic Airspeed and Mach Equations
4.2	Scale Altitude (Compressibility) Correction
4.3	Subsonic Relations between Compressible and Incompressible Dynamic Pressure
4.4	Supersonic Airspeed and Mach Equations
4.5	Total Temperature Equation
4.6	Altimeter Equation
4.7	Position Error Test Methods
4.8	Position Error Certification Requirements
4.9	PEC Correction Process Flow Chart
4.10	Airspeed/Altitude/Mach Graphic Relation
4.11	Effect of Errors on Calibrated Airspeed and Altitude

5	Aerodynamics
5.1	Dimensional Analysis Interpretations
5.2	General Aerodynamic Relations
5.3	Wing Design Effects on Lift Curve Slope
5.4	Elements of Drag
5.5	Aerodynamic Compressibility Relations
5.6	Drag Polars
6	Axis Systems and Transformations
6.1	Earth Axis System
6.2	Aircraft Axis System
6.3	Euler Angles
6.4	Flightpath Angles
6.5	Axis System Transformations
7	Mass Properties
7.1	Abbreviations and Terminology
7.2	Longitudinal and Lateral <i>cg</i> Measurement
7.3	Vertical <i>cg</i> Measurement
7.4	Moment & Product of Inertia Measurement
8	Motion/Vibration Analysis
8.1	Recurring Abbreviations
8.2	First Order Motion
8.3	Second Order Motion
8.4	Complex Plane
8.5	Parameter Conversions
8.6	Vibration Nomograph
9	Material Strength (Loads)
9.1	Terminology
9.2	Material Stress and Strain
9.3	V-n Diagram
9.4	Strain Gauges
10	Reciprocating Engines
10.1	Abbreviations and Terminology
10.2	Reciprocating Engine Modeling
10.3	Reciprocating Engine Power Standardization
10.4	FAA Approved Engine Temp. Corrections
11	Propellers
11.1	Abbreviations and Terminology
11.2	Propeller Geometry
11.3	Propeller Coefficients
11.4	Efficiency and States
11.5	Propeller Theory
11.6	Propeller Modeling
11.7	Propeller Flight Test

- 12 Fixed-Wing Performance Standardization
 - 12.1 Recurring Abbreviations
 - 12.2 Standardization Techniques
 - 12.3 Takeoff Distance
 - 12.4 Landing Distance
 - 12.5 Climb/Descent/Acceleration
 - 12.6 Level Turn Performance
 - 12.7 Reciprocating Engine Cruise Performance
 - 12.8 Jet Aircraft Cruise Performance
- 13 Acoustics
 - 13.1 Abbreviations and Terminology
 - 13.2 Velocities, Spectrum, and Reference Levels
 - 13.3 Pressure, Intensity
 - 13.4 Weighting Curves
 - 13.5 1/3 Octave Center Frequencies
- 14 Electromagnetic Compatibility (EMC)
 - 14.1 Introduction
 - 14.2 Abbreviations
 - 14.3 Terms
 - 14.4 Fundamentals
 - 14.5 Electromagnetic Interference (EMI)
 - 14.6 Testing
 - 14.7 Lightening
 - 14.8 High Intensity Radiated Fields (HIRF)
 - 14.9 Precipitation Static (Pstatic)
 - 14.10 Reference Material
- 15 Handling Qualities
 - 15.1 Cooper-Harper Rating Related Figures
- 16 Rotary Wing
 - 16.1 Principal Aeroderivatives
 - 16.2 Forward Flight Static And Dynamic Stability
- 17 Gas Turbine Propulsion
 - 17.1 Turbine Engine Basics
 - 17.2 Propulsion System Analysis
 - 17.3 Turbine Engine Operation
 - 17.4 Additional Information
- 18 Radio Communications
